CAP COMPONENTS

Crown

The Crown is the part of the cap that sits on the top of the head. It is comprised of a number of triangular cut pieces known as panels that, when sewn together, create a round shape to fit the head. A cap crown can either be structured or unstructured.

Panel

The panels of the cap are the different pieces of material, sewn together, to make the cap. Number of panels can range between 5 & 6 panels depending on the style of cap/hat.

Sweatband

Only found on some caps & hats, the sweatband runs along the inside of the cap or hat & insures that perspiration is absorbed.

Closure

They close the cap or hat in the back. Our fitted caps & hats are just sewn closed in the back but have stretchy material to fit comfortably on the head. Our adjustable caps & hats have a variety of closures, please see section on cap closures for the different closing mechanisms available below.
